PROFESSIONAL SUMMARY

Fresh Graduate Computer Engineer specializing in AI Automation and Intelligent Systems with hands-on experience designing end-to-end business workflow automations using n8n, Zapier, and GoHighLevel. Designed and developed AI-powered solutions integrating OpenAI, Claude, Google Gemini, REST APIs, Webhooks, PostgreSQL (Supabase), and Airtable to automate CRM operations, customer support, sales analytics, and business workflows. Seeking to help businesses streamline operations through scalable AI-powered workflow automation and intelligent system integrations.

EDUCATION

Technological Institute of the Philippines - Quezon City
Bachelor of Science in Computer Engineering

August 2021 - June 2026

EXPERIENCE

Web Application Developer Intern | Quezon City Government

March 2025 – May 2025

- Developed and maintained internal government web applications by implementing features, debugging issues, and optimizing existing functionalities.
- Leveraged Claude to accelerate software development, testing, database management, and deployment while collaborating with stakeholders to deliver system enhancements.

PROJECTS

AI Dental Appointment Setter

- Developed an AI-powered voice appointment assistant using n8n, Vapi.ai, Google Calendar, and Airtable, automating scheduling across 11 appointment types.
- Designed 5 interconnected workflows (56 workflow nodes) integrating REST APIs and webhooks to automate booking, rescheduling, cancellation, patient intake, and AI call processing.

AI Sales Analytics Assistant

- Developed an AI-powered sales analytics assistant using n8n, OpenAI, PostgreSQL (Supabase), and SQL, enabling natural language analysis of 240+ sales records.
- Designed conversational AI workflows that automated revenue analysis, product comparisons, aggregations, and date-based reporting across 240+ sales records without requiring manual SQL queries.

Facebook Messenger AI Inquiry Assistant

- Developed an AI-powered customer support assistant using n8n, OpenAI, and Google Docs, automating responses to 102 frequently asked questions through a Retrieval-Augmented Generation (RAG) knowledge base.
- Implemented bilingual conversational support in English and Tagalog while maintaining contextual awareness through prompt engineering.

Automated Car Insurance Sales Pipeline

- Designed and implemented 5 CRM automation workflows using GoHighLevel, automating customer progression across 4 sales pipeline stages.
- Automated quotation delivery, payment link distribution, policy document generation, and lead nurturing through CRM workflow automation.

AI Lead Qualification & Outreach Automation

- Developed an AI-powered lead qualification workflow using Zapier, YouForm, Gemini 2.5 Flash, Apollo API, Supabase REST API, and Slack, automating lead capture, enrichment, qualification, and notification workflows.
- Integrated Apollo API for company enrichment and the Supabase REST API for automated lead storage, enabling AI-driven lead scoring and real-time outreach recommendations.

Deep Learning-Based Rebar Column Measurement System for Cement Mixture Estimation

- Developed a Mask R-CNN-based computer vision system using Mask R-CNN to estimate rebar dimensions for cement mixture recommendations.
- Achieved 96.3% validation success, 95% measurement accuracy, and 95% material recommendation accuracy with an approximate $\pm 5\%$ measurement error.
- Received an overall stakeholder evaluation score of 4.54/5.

TECHNICAL SKILLS

- AI Automation:** n8n, Zapier, GoHighLevel (GHL), AI Agents, Prompt Engineering, Retrieval-Augmented Generation (RAG), Voice AI, OpenAI, Claude, Google Gemini
- Integration & APIs:** REST APIs, Webhooks, JSON, HTTP Requests, Google Workspace APIs, Facebook Messenger API, Slack API, Google Calendar API
- Databases:** PostgreSQL (Supabase), MySQL, Airtable
- Programming:** Python, JavaScript, PHP, SQL
- AI / Machine Learning:** TensorFlow, Mask R-CNN, Computer Vision, Deep Learning
- Web Technologies:** Flask, HTML, CSS, Bootstrap
- Tools:** Git, GitHub
